Education

University of Saskatchewan

Bachelor of Science with a **Major in Computer Science**

Knowledge

Laravel Framework development for a Fortune 500 company.

– Optimization and refactoring of a large legacy application

– Source control and Test Framework experience

– Aware of PSR coding standards - will follow team preferences

– Strive to meet deadlines and flag ahead of time if they cannot be met

– Accustomed to frequent releases of large features, and overlapping tasks with other teammates

– Curious to find the source of bugs rather than create quick fixes

– Follow new advancements in Laravel and topics from big name developers

– Mostly backend but familiar with mockups, web standards, accessibility issues, responsive design, css, and javascript

– Remote work experience, as well as in office

– Know the pain of Technical Debt and prefer to avoid it
